SOFT SKILLS

Teamwork, Time management,
Problem solving, Fast Learner

PROFILE

I am a highly experienced and detail-oriented Full Stack Web Developer with 5 years of industry experience. Throughout my career, I have demonstrated a strong ability to develop and enhance applications for clients, utilizing my expertise in the entire software development lifecycle (SDLC). With my dynamic approach, I excel in delivering exceptional results and possess excellent interpersonal, multitasking, and communication skills. Now, I am seeking an opportunity to leverage my knowledge and experience in a Technical lead role as a Software Developer.

WORK EXPERIENCE

Senior Software Engineer

LTImindtree - New Delhi, India   Feb 2022 - Present

- Led a team of developers in designing and implementing complex Angular applications.
- Developed robust and scalable front-end solutions using Angular framework.
- Implemented best practices and coding standards to ensure high-quality code and maintainable applications.
- Collaborated closely with UI/UX designers to create visually appealing and user-friendly interfaces.
- Conducted code reviews and provided constructive feedback to junior developers for continuous improvement.
- Integrated RESTful APIs and third-party libraries into Angular applications.
- Optimized application performance and identified and resolved performance bottlenecks.
- Implemented automated testing using frameworks such as Jasmine and Protractor to ensure code quality and reliability.
- Mentored and coached junior developers, fostering a collaborative and learning-oriented environment.

Senior Software Engineer

OSG Analytics – Bengaluru, India   Feb 2021 - Feb 2022

- Engineered a dynamic and interactive web application that significantly boosted sales revenue by 40% and drove high traffic and page views to enhance the overall user experience.
- Successfully revamped web application security measures, resulting in a remarkable 90% reduction in spammers and ensuring a more secure environment for users.
- Demonstrated exemplary project management skills by overseeing the full lifecycle of software development for five projects, delivering all projects on time with a flawless 100% success rate.
- Conducted comprehensive training sessions for multiple staff members, equipping them with the knowledge and skills to independently handle minor updates and changes within internal applications.
- Resolved bugs in the existing application and implemented impactful enhancements, leading to substantial improvements in application functionality and speed.

Software Engineer

HCL Technologies - Noida, India   July 2018 - Feb 2021

- Utilize authoring or scripting languages, content creation tools, and management tools to design, develop, and maintain web applications.
- Perform web application updates and oversee the process as needed.
- Collaborate with management or development teams to prioritize requirements, resolve conflicts, establish content criteria, and select appropriate solutions.
- Identify issues identified through testing or customer feedback and take necessary actions to correct them or escalate them to the relevant personnel for resolution.
- Evaluate code for validity, proper structure, adherence to industry standards, and compatibility with various browsers, devices, and operating systems.
- Develop supporting code for web applications to enhance their functionality and performance.

TRAININGS

Angular 7+ (Udemy.com)

Learned angular Components, Directives, Pipes, Routing, Lazy Loading, Dependency injection, Reactive forms etc.

Nodejs (Udemy.com)

Learned Rest APIs, Middleware, Route Handlers, MongoDB operations, 3rd party integration, JWT authentication etc

Java Framework (HCL Tech.)

Learned JAVA core, JSP, Servlet, Hibernate, JDBC and hands on experience in SQL.
